About me

Three years ago, I started working as a full-time web programmer, thanks to a PHP internship. Throughout my career journey, I have practiced with technologies like PHP, Javascript, CSS, and MySQL. Moreover, I have brought my contribution to providing solutions for external projects in diverse industries (real estate and law) and also for internal projects. At this moment, I am passionate about Front-End development and I want to enrich my knowledge in this direction. I am also a self-taught person so I have learned React and advanced Javascript principles.

Work Experience

Web Developer
Roweb Development, Pitesti, Romania
September 2019 to Present
(3 years, 6 months)

- Strong knowledge of HTML, CSS and JavaScript;
- Develop functionality for various specifications using PHP;
- Experience with the Laravel framework;
- Version control with Git;
- Basic knowledge of Vue.js framework (fetch data from an API, create functions, use conditional rendering, install components using NPM, develop code for responsive user interfaces);
- Understand and write MySQL queries;
- Experience using WordPress;
- Maintain, update and develop new functionalities for a CMS (Content Management System) platform;
- Implement responsive user interfaces based on the design specifications;
- Communicate and provide solutions based on teamwork;
- Improve the Page Speed for pages and use the best practices for SEO specifications;
- Basic knowledge using Linux and Docker;

Others (Individual study) : React (practice with Udemy courses, create projects based on Frontend Mentor challenges).

Projects overview

Throughout my professional growth I have worked on three main projects:

- for almost a year I was part of a team that began to develop a platform in the real estate industry. The team consisted of 4 developers and was divided equally for frontend and backend and I was mainly in charge of the business website, made with Vue.js.

- for almost 3-4 months I worked part-time at the transition of an admin platform in the law industry, which had to be rewritten from Vanilla JavaScript into Vue.js code.

- for more than 2 years, I have worked at maintaining and updating a CMS. Being the only developer in charge of the site, I develop new functionalities or refactorize the old code, in PHP. But, most of the time, I am writing code to develop or update the design of the new or old pages using CSS, JavaScript / jQuery. Also, I work with WordPress, from time to time.

Education History

Universitatea din Pitesti
Bachelor's degree, Informatics (October 2017 - July 2020)
- *Training at Prodinf Software (Java applications and MySQL queries);*
- *Erasmus+ scholarship;*
- *Internship at Roweb Development - getting started with Laravel framework;*
- *Web application workshop.*

Vilnius University
One semester scholarship, Informatics (August 2018 - February 2019)
I had a cultural experience while being a student abroad. Also, I had the chance to practice the subjects with a lot of team projects. The courses units were:
- Database Management System;
- Human-Computer Interaction;
- Algorithm Theory.

Colegiul National "Ion C. Bratianu"
High School Diploma, Mathematics - Informatics (September 2013 - July 2017)

Language skills

Mother tongue: Romanian
Other language: English (B2)
